A condition where airways narrow and swell.

Symptoms: Wheezing, shortness of breath, chest tightness.

5. Migraine

A neurological condition causing intense headaches.

Symptoms: Nausea, sensitivity to light, throbbing pain.

6. Influenza (Flu)

A viral infection affecting the respiratory system.

Symptoms: Fever, cough, sore throat, fatigue.

7. Diabetes Mellitus

A chronic disease affecting glucose metabolism.

Symptoms: Frequent urination, thirst, fatigue.

8. Hypertension

High blood pressure causing strain on arteries.

Symptoms: Headaches, dizziness, blurred vision.

9. Asthma

A condition where airways narrow and swell.

Symptoms: Wheezing, shortness of breath, chest tightness.

10. Migraine

A neurological condition causing intense headaches.

Symptoms: Nausea, sensitivity to light, throbbing pain.

11. Influenza (Flu)

A viral infection affecting the respiratory system.

Symptoms: Fever, cough, sore throat, fatigue.

12. Diabetes Mellitus

A chronic disease affecting glucose metabolism.

Symptoms: Frequent urination, thirst, fatigue.

13. Hypertension

High blood pressure causing strain on arteries.

Symptoms: Headaches, dizziness, blurred vision.

14. Asthma

A condition where airways narrow and swell.

Symptoms: Wheezing, shortness of breath, chest tightness.

15. Migraine

A neurological condition causing intense headaches.

Symptoms: Nausea, sensitivity to light, throbbing pain.

16. Influenza (Flu)

A viral infection affecting the respiratory system.

Symptoms: Fever, cough, sore throat, fatigue.

17. Diabetes Mellitus

A chronic disease affecting glucose metabolism.

Symptoms: Frequent urination, thirst, fatigue.

18. Hypertension

High blood pressure causing strain on arteries.
Symptoms: Headaches, dizziness, blurred vision.

19. Asthma

A condition where airways narrow and swell.
Symptoms: Wheezing, shortness of breath, chest tightness.

20. Migraine

A neurological condition causing intense headaches.
Symptoms: Nausea, sensitivity to light, throbbing pain.

21. Influenza (Flu)

A viral infection affecting the respiratory system.
Symptoms: Fever, cough, sore throat, fatigue.

22. Diabetes Mellitus

A chronic disease affecting glucose metabolism.
Symptoms: Frequent urination, thirst, fatigue.

23. Hypertension

High blood pressure causing strain on arteries.
Symptoms: Headaches, dizziness, blurred vision.

24. Asthma

A condition where airways narrow and swell.
Symptoms: Wheezing, shortness of breath, chest tightness.

25. Migraine

A neurological condition causing intense headaches.
Symptoms: Nausea, sensitivity to light, throbbing pain.

26. Influenza (Flu)

A viral infection affecting the respiratory system.
Symptoms: Fever, cough, sore throat, fatigue.

27. Diabetes Mellitus

A chronic disease affecting glucose metabolism.

Symptoms: Frequent urination, thirst, fatigue.

28. Hypertension

High blood pressure causing strain on arteries.

Symptoms: Headaches, dizziness, blurred vision.

29. Asthma

A condition where airways narrow and swell.

Symptoms: Wheezing, shortness of breath, chest tightness.

30. Migraine

A neurological condition causing intense headaches.

Symptoms: Nausea, sensitivity to light, throbbing pain.

31. Influenza (Flu)

A viral infection affecting the respiratory system.

Symptoms: Fever, cough, sore throat, fatigue.

32. Diabetes Mellitus

A chronic disease affecting glucose metabolism.

Symptoms: Frequent urination, thirst, fatigue.

33. Hypertension

High blood pressure causing strain on arteries.

Symptoms: Headaches, dizziness, blurred vision.

34. Asthma

A condition where airways narrow and swell.

Symptoms: Wheezing, shortness of breath, chest tightness.

35. Migraine

A neurological condition causing intense headaches.

Symptoms: Nausea, sensitivity to light, throbbing pain.

36. Influenza (Flu)

A viral infection affecting the respiratory system.

Symptoms: Fever, cough, sore throat, fatigue.

37. Diabetes Mellitus

A chronic disease affecting glucose metabolism.

Symptoms: Frequent urination, thirst, fatigue.

38. Hypertension

High blood pressure causing strain on arteries.

Symptoms: Headaches, dizziness, blurred vision.

39. Asthma

A condition where airways narrow and swell.

Symptoms: Wheezing, shortness of breath, chest tightness.

40. Migraine

A neurological condition causing intense headaches.

Symptoms: Nausea, sensitivity to light, throbbing pain.

41. Influenza (Flu)

A viral infection affecting the respiratory system.

Symptoms: Fever, cough, sore throat, fatigue.

42. Diabetes Mellitus

A chronic disease affecting glucose metabolism.

Symptoms: Frequent urination, thirst, fatigue.

43. Hypertension

High blood pressure causing strain on arteries.

Symptoms: Headaches, dizziness, blurred vision.

44. Asthma

A condition where airways narrow and swell.

Symptoms: Wheezing, shortness of breath, chest tightness.

45. Migraine

A neurological condition causing intense headaches.
Symptoms: Nausea, sensitivity to light, throbbing pain.

46. Influenza (Flu)

A viral infection affecting the respiratory system.
Symptoms: Fever, cough, sore throat, fatigue.

47. Diabetes Mellitus

A chronic disease affecting glucose metabolism.
Symptoms: Frequent urination, thirst, fatigue.

48. Hypertension

High blood pressure causing strain on arteries.
Symptoms: Headaches, dizziness, blurred vision.

49. Asthma

A condition where airways narrow and swell.
Symptoms: Wheezing, shortness of breath, chest tightness.

50. Migraine

A neurological condition causing intense headaches.
Symptoms: Nausea, sensitivity to light, throbbing pain.
